

## **Update on CAS Native Range**

According to Dr. Chandrashekara A. Viraktamath of the Department of Entomology at the University of Agricultural Sciences in Bangalore, India, *Aulacaspis yasumatsui* has so far not been recorded from that country. The CSG Subgroup on Invasive Pests “CAS Report” and “CAS Pest Alert” documents have now been updated, and any future issuance of information regarding the native range of this invasive pest insect will also be modified accordingly.
